## Basic Information

**Name:** Han Wu
**Phone:** +86 19355693187
**University:** Shanghai Jiao Tong University
**Email:** wuhan9918@gmail.com
**Major:** Automation (IEEE Honor Class)
**Website:** hanwu9918.github.io

## Education

**The Hong Kong University of Science and Technology** (QS Top 50) Sep 2027 – Jan 2029 (Expected)
*M.Sc. in Computer Science (Big Data Technology), admitted* *Hong Kong*

**Shanghai Jiao Tong University** (C9 / 985) Aug 2023 – Jun 2027 (Expected)
*B.Eng. in Automation (IEEE Honor Class); Minor in Law (Intellectual Property)* *Shanghai*

- Coursework: Computer Vision, Artificial Intelligence Theory, Machine Learning, Robotics; English: IELTS 7.0 / CET-6 609 / CET-4 630.
- Honors: HKUST Admission Scholarship (HKD 50,000); SJTU Zhiyuan Honors Scholarship.

## Publications

**Jize Wang, Han Wu, Zhiyuan You, ..., Dacheng Tao**
*RouteMoA: Dynamic Routing without Pre-Inference Boosts Efficient Mixture-of-Agents.* Accepted as a long paper at **ACL** 2026 (CCF-A), second author; Paper: aclanthology.org/2026.acl-long.558; Code: github.com/Jize-W/RouteMoA.

*FilmBench: A Film-Grade Benchmark for Cinematic Video Generation.* arXiv preprint; under review at **AAAI** 2027; Paper: arxiv.org/abs/2607.24241; Code: github.com/Neo-yk/FilmOps; contributing author.

## Internship

**Alibaba (China) Co., Ltd.** (Data Technology & Product Dept.) Jun 2026 – Sep 2026
*Foundation Model Evaluation Intern | Mentor: Niantong Li (core contributor to Qwen-Image)* *Hangzhou*

- Contributed to evaluation systems and evaluation data for in-house multimodal models across video generation and image editing, covering evaluation-set construction, scoring-rule design, and result attribution.

**FilmBench**

- Evaluated HappyHorse, Seedance 2.0, Kling, and Veo 3.1 on a film-grade T2V/R2V benchmark (3 dimensions, 12 components, 35+ sub-metrics), using prompts reverse-engineered from award-winning films.
- Mapped generated videos onto shot size, composition, camera placement, and multi-shot continuity; contributed to the automated evaluation agent and annotation rules, surfacing gaps in motion aesthetics and shot transitions.

**QwenEditBench**

- Analysed the distribution of Qwen user-side feedback data and LMArena battle data, structured layering dimensions by edit intent and failure mode, and helped build the evaluation framework and taxonomy.
- Owned prompt design, sample screening, and quality review for Judge-model training data and evaluation sets, calibrating scoring criteria through manual spot checks; expected to be published as a contributing author.
- Evaluated GPT Image 2, Nano Banana 2 and other mainstream image-editing models, producing failure-case attributions and identifying shared weaknesses in instruction following and local edits.

## Projects

**Code2Image Benchmark: Code-Generated Images** Sep 2026 – Present
*VisionXLab, Shanghai Jiao Tong University | Research Assistant* *Shanghai*

- Contributed to building the Code2Image benchmark, covering infographics and visual design across text-to-image and image-reconstruction settings, evaluating the ability of foundation models to generate images through SVG, HTML/CSS code.
- Co-designed the evaluation metrics and automated pipeline: render success rate, latency, and token consumption from the agent-execution side to measure reliability and cost; instruction following, visual quality, and aesthetics from the image side.
- Exploring a training-free self-evolving Judge model, iterating evaluation prompts and scoring rules around evaluation feedback and score consistency to improve stability and reliability.

## Core Competencies

- **Programming & Engineering:** Python, C++; familiar with Git and Linux; proficient with AI coding assistants such as Qoder and Codex.
- **Evaluation Methods:** LLM-as-a-Judge (pointwise / pairwise), scoring-rule design, and manual spot-check calibration.
